bitumen

UNITED KINGDOM

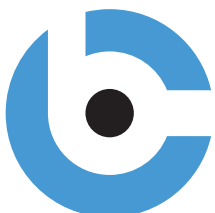

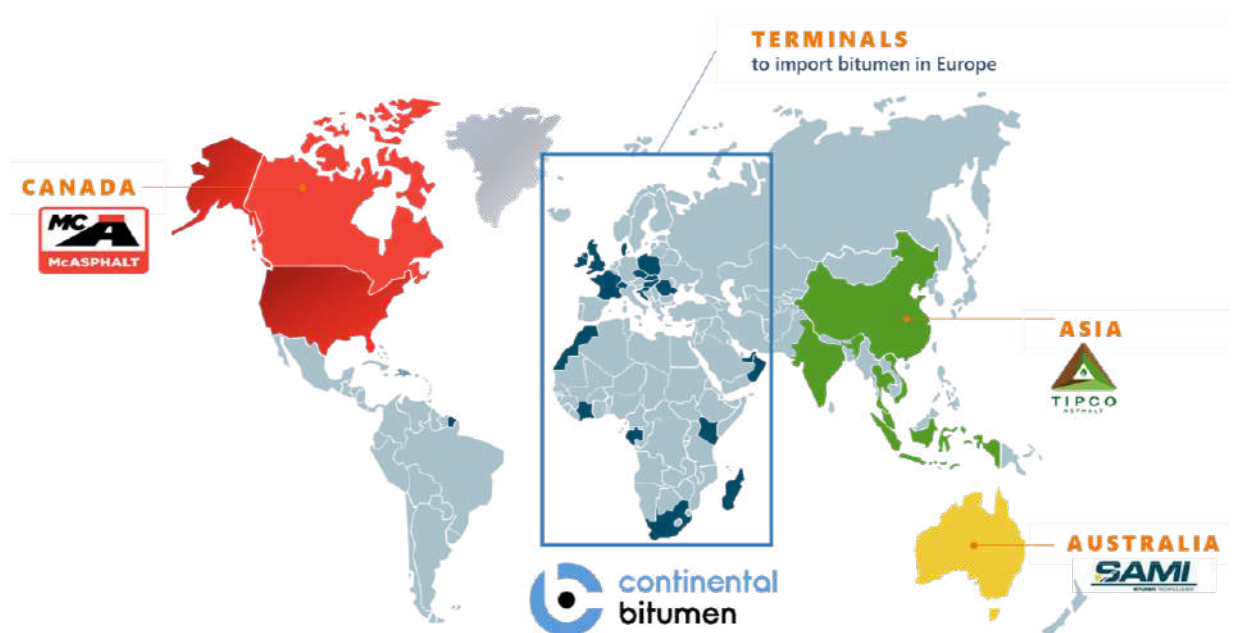

Continental Bitumen is part of the Colas Group, a major global bitumen organisation who trade over 5 million tons of bitumen each year.

This makes the Colas Group the single largest purchaser of bitumen globally.

The group has its own shipping fleet with global reach.

The Colas Group is now bringing this global capability and experience to the United Kingdom with Continental Bitumen investing in a new bitumen production and storage facilities and expanding current manufacturing capability.

- NEW bitumen import and blending facility in Avonmouth (under construction)
- NEW PMB manufacturing unit in Warrington (fully operational)

Carbon Neutral by 2030

Continental Bitumen will offer an industry leading low carbon supply chain:

- Two LNG / Bio-LNG Ships with hybrid technology
- Bitumen depot utilising LNG / Bio-LNG
- LNG / BIO-LNG delivery vehicles
- Low carbon bitumen technologies

A brand new supplier to the UK market, continental Bitumen will offer:

- High quality Pen and modified bitumen
- Warm Mix (-30°C to 40°C) bitumen and additives
- Low odour / urban bitumen
- Polymer modified bitumen
- Speciality products including industrial applications

Introducing COLRUG Polymer modified Bitumen

Colrug PMB is a highly modified elastomeric binder with superb resistance to permanent deformation and cracking and has been engineered for use in most types of asphalt mixtures across a wide range of paving applications including TS2010, WG SMA PAG 112/20 and Clause 942.

- Superb storage stability
- Available across the UK
